

Foot Controls

1. What is the function of the gas (accelerator) pedal?
2. Why is the same foot used for both the gas and the brake pedals?
3. Why is the foot brake applied “progressively”?
4. What 2 important reasons are there for using the footbrake, not the handbrake, for stopping?
5. Which foot is used for operating the clutch?
6. When is the clutch used?
