

Mirrors

When to use

- Change of speed
- Before any maneuver
 - Junction - Roundabout
 - Parked cars
 - Traffic lights – Pedestrian Crossing
 - Changing Lanes - Overtaking
 - Etc....
- On a straight road
 - Approx every 10 secs

Why to use

- To be fully aware of any other traffic ALL around

How to use

- Use in pairs
 - Because of position – get 2 different views
 - Because of type of glass – get 2 different angles

Types of Glass

- Centre mirror – Flat
 - More accurate idea of distance
- Door mirrors – Convex
 - Wider angle of vision

Vehicles Behind Too Close

- Allow more time for maneuver
- Slow down
 - Make enough distance for an Emergency Stop

Anti Dazzle

- Adjust lever
